

ASSOCIAZIONE COLUMBUS TORINO

Internship opportunities

Work themes

The Columbus Association and the Turin Euro-Latin American Forum offer internships and professional development opportunities for future graduates in a variety of fields: economy, political sciences, administration, business engineering, international relations, education management and related areas.

Columbus and the Forum promote and generate cooperation between Europe and Latin America, focusing on higher education and/or regional innovation systems. We work with universities and public and private stakeholders of innovation (local governments, chambers of commerce, incubators, businesses, etc.). Working with us allows interns to familiarize themselves with the real Latin American context.

Duties

The duties will vary according to individual skills.

They can involve project management in concrete areas, coordinating research projects on related themes or disseminating opportunities and creating networks within the framework of the European Commission Framework Programme

Some of the current projects interns could be involved in are:

- a Study Platform to promote our members' most attractive courses
- a benchmarking club (<http://www.forumtorino.org/index.php?IDpage=638&lang=eng>)
- inter-regional networking (www.forumtorino.org)

Requirements

The minimum duration of the internships is 5 months.

Participants must be in their final year before graduation.

Participants must have excellent written and verbal knowledge of either English or Spanish and basic knowledge of the other language.

Participants must be team-players and good communicators.

They must have good computer skills, be familiar with web 2.0 tools, databases and social networks.

Previous experience with European projects, though not a requirement, would be appreciated.
